DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2 and 10 are drawn to a semiconductor device, classified in class 257, subclass 659.
 - II. Claims 3-9 and 11-15 are drawn to a method of making a semiconductor device, classified in class 438, subclass 123.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by a materially different process such as by depositing rather than by the printing process claimed in claim 3.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status of art as shown by their different classification, restriction for examination purposes is proper.
4. Examiner called Attorney Michael S. Huppert on April 14, 2003, to make a provisional election to prosecute the invention. However, the attorney failed to respond to the message and has therefore failed to affirm the election. Affirmation of this election must be made by applicant in replying to this Office action.

Art Unit: 2814

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion
